

# Traveler Solutions

Porter Case is the perfect case for many occupations. The Porter Case product line contains a variety of interior options designed with your needs in mind, to protect, carry, and organize your valuable professional equipment, instruments, samples - anything you need to protect. Whatever your profession, Porter Case will make your travel easier. Used by executives, speakers, trainers, trade show specialists, photographers, technicians, and many others as an organizer for relaxed, hassle-free travel.

## It's a Case...a Tote...a CART. All in one!

Protect your valuables! Transport your gear in the only hard-sided, wheeled, carry-on with a built-in cart. To convert, simply pull two latch pins, fold your Porter Case down to the cart Position, stack your other baggage on top, and away you go. Porter Case's exclusive design eliminates the hassles of carrying cumbersome gear on those long walks through terminals and parking lots. Only Porter Case offers you the convenience of a cart feature!

The airline regulation carry-on size Porter Case rolls easily down aisles and will fit under most seats and in overhead compartments. Keep your most important valuables with you by rolling them on board and checking the rest. Take your Porter Case with you on trains, planes, ships, and autos. It's the most efficient way to travel. It saves time, money, and eliminates looking for a Skycap, airport cart rental, or Bellman - and forget about tipping!

Use your Porter Case every day - for trips across town, down the hall, wherever you need sturdy, rugged transport for your gear. With Porter Case, your most important valuables and your **CART** are always with you...you'll never need another set of wheels! Porter Case takes you anywhere you need to go!
